

SOPHIA THAPA MAGAR

Jhamsikhel, Lalitpur | 9869686538 | sophia.thapa55@gmail.com | <https://github.com/sophiathapa>

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience building responsive, performance focused web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in developing RESTful APIs, managing databases, and creating intuitive user interfaces, with a strong focus on clean code and scalable architecture.

EDUCATION

Kantipur Engineering College

Bachelor of Engineering in Computer Engineering

2021 - 2025

Dhapakhel, Lalitpur

EXPERIENCE

Wolfmatrix

Backend Intern

Feb 2026 – May 2026

Sanepa, Lalitpur

- Designed and developed a Role-Based Access Control (RBAC) system that dynamically managed staff permissions and sidebar access based on assigned roles within shipper organizations.
- Implemented staff hierarchy and user management features, enabling shippers and authorized staff to create, manage, and oversee subordinate staff accounts under a centralized organizational structure.
- Improved application performance and maintainability by optimizing backend code, troubleshooting production issues, and resolving bugs across logistics, bidding, and shipment-tracking workflows.

Aster Innovations

Frontend Intern

Jun 2025 – Oct 2025

Sitakwa Marg, Lalitpur

- Developed interactive and responsive user interfaces using JavaScript and the React.js library, ensuring cross browser compatibility and mobile-friendly layouts.
- Built reusable React components to maintain consistent design and improve development efficiency across the application.
- Collaborated with the team to integrate front-end features with APIs, enhancing dynamic content rendering and overall user experience

PROJECTS

Samiksha Sansar | JavaScript, Tailwind CSS, shadcn/ui, React, Redux, Express.js, Node.js, MongoDB

- Developed a full-stack web platform using **MERN** where users and admin can manage books.
- Built a dynamic and responsive user interface using **JavaScript** library **React**, styled with **Tailwind CSS** and **shadcn/ui** components. Integrated Redux for state management to efficiently handle saved and borrowed books and overall app state. Implemented smart search, filters, and interactive UI elements to deliver enhanced user experience.
- Implemented a complete RESTful API using **Node.js** and **Express.js**, integrating secure authentication and authorization with **JWT**, and connected the system to **MongoDB** for managing books and user data efficiently.

Yatri | JavaScript, Tailwind CSS, shadcn/ui, leaflet, React, Redux, Express.js, Node.js, MongoDB

- Yatri is a comprehensive bus and vehicle management system built with the **MERN** stack to manage bus operations efficiently, including route creation, and real-time vehicle tracking.
- It incorporates MongoDB for database management, Mongoose for schema modeling, Express.js and Node.js for building RESTful APIs, and Next.js with Tailwind CSS for responsive, user-friendly UI.
- Implementation of **Leaflet** library for interactive maps and Haversine-distance for calculating distances between stops, enhancing real-time tracking and route optimization.

TECHNICAL SKILLS

Soft Skills: Communication, Team Collaboration, Leadership, Time Management, Organizational Skills, Adaptability, Attention to Detail

Languages: JavaScript, TypeScript, HTML, CSS, Python

Frameworks/Libraries: Nest.js, Tailwind CSS, React, Next.js, Redux, Express.js, JWT, Nodemailer

Tools: VS Code, GitHub, Postman, Figma, Clickup

Databases: MongoDB, PostgreSQL

ACHIEVEMENTS / CERTIFICATIONS

- Secured **3rd place** at **All Girls Hackathon** organized by **Women Leaders in Technology**.
- Received certificate of participation at KEC LITE Inter College Technical Exhibition.
- Completed **MERN Stack Development training** at Broadway Infosys.
- Completed **Python for Data Science** course at KEC.
